# Battle Green Improvements Project Intersection of Bedford Street @ Hancock Street / Harrington Road

Board of Selectmen Meeting July 13, 2015

## **Project Limits**

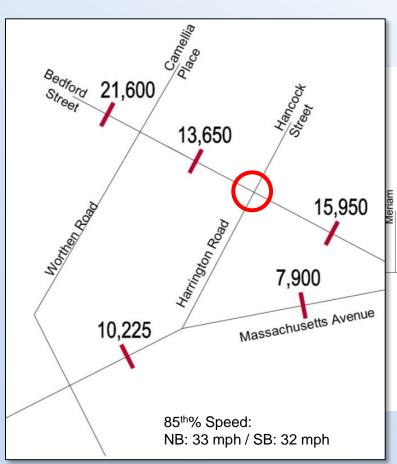

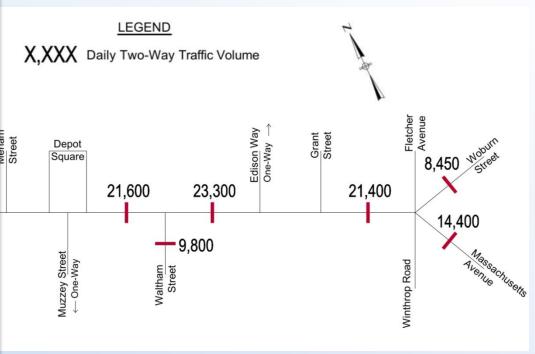

#### **Discussion Points**

- 1. Traffic Data
- 2. Accident/Safety Analysis
- 3. Existing Deficiencies
- 4. Improvement Option Evaluation

### **Existing Average Daily Traffic Volumes**

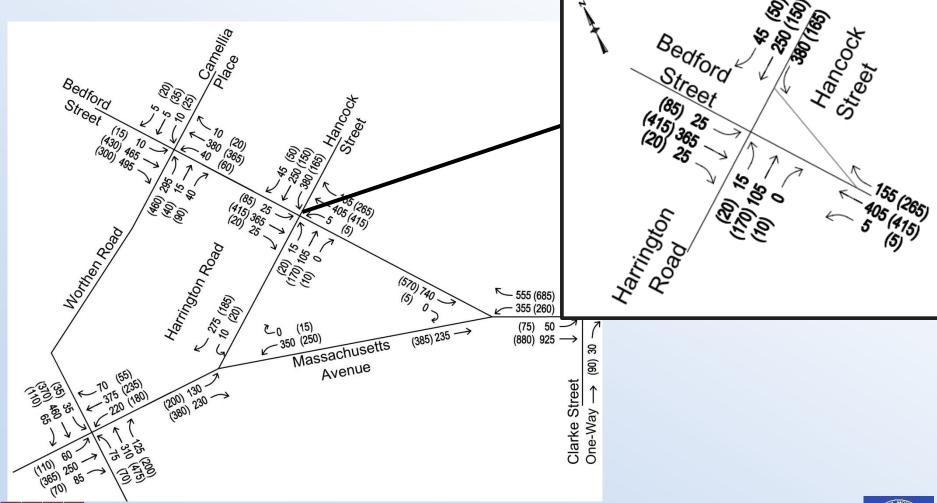

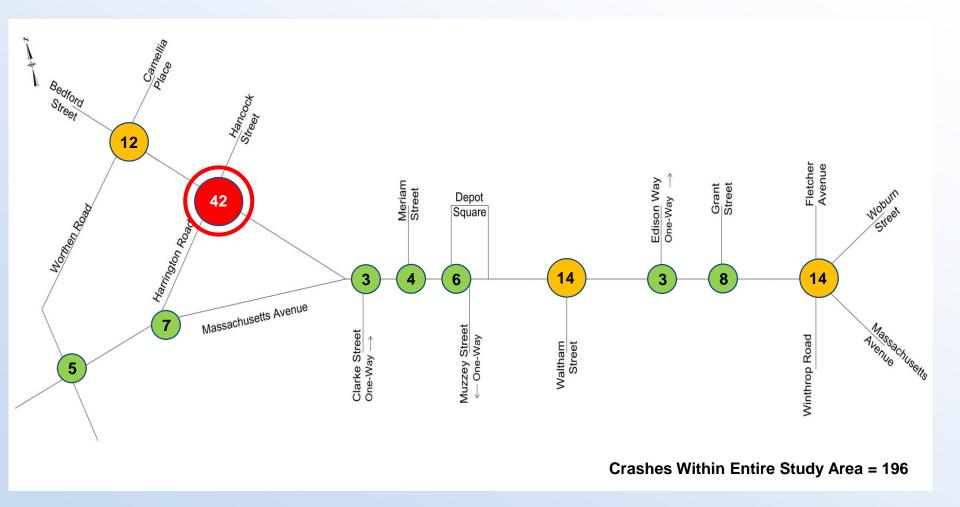

## Existing Peak AM and PM Turning Movement Volumes

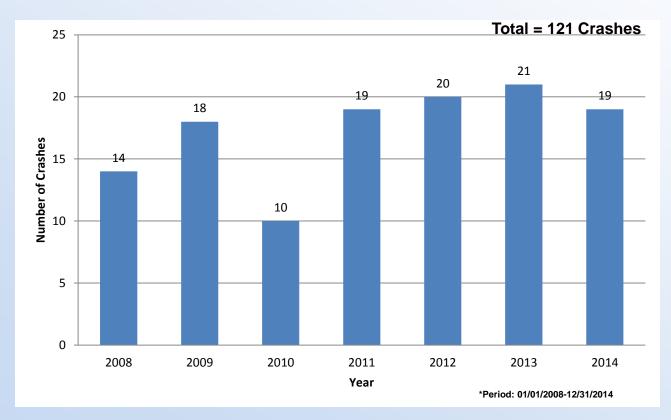

## Intersection Crash History (2008-2010)

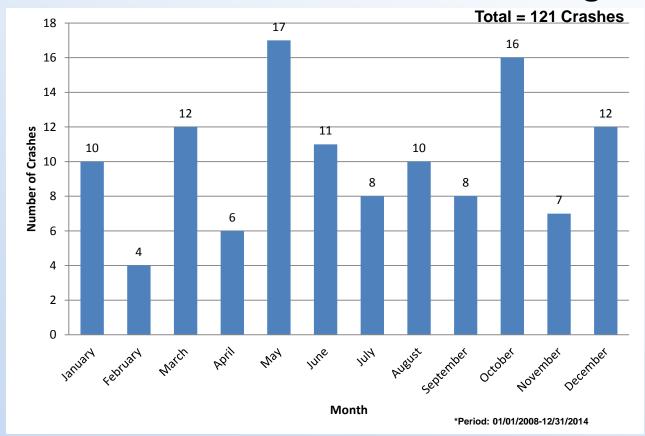

## Number of Crashes by Year

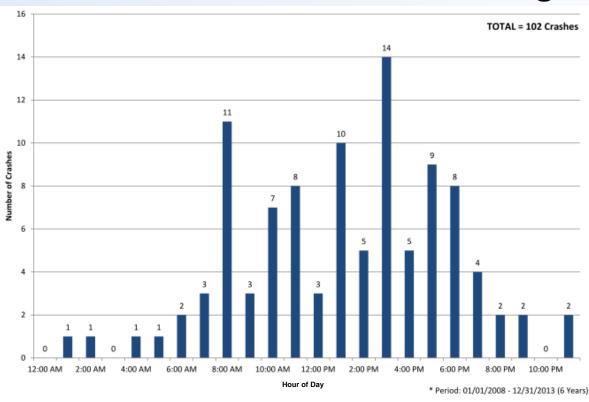

## Number of Crashes by Month

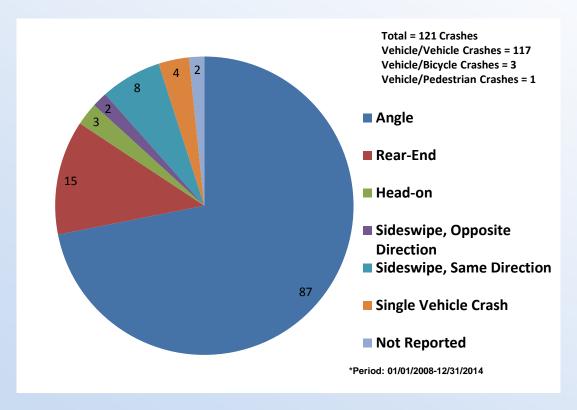

## Number of Crashes by Hour of Day

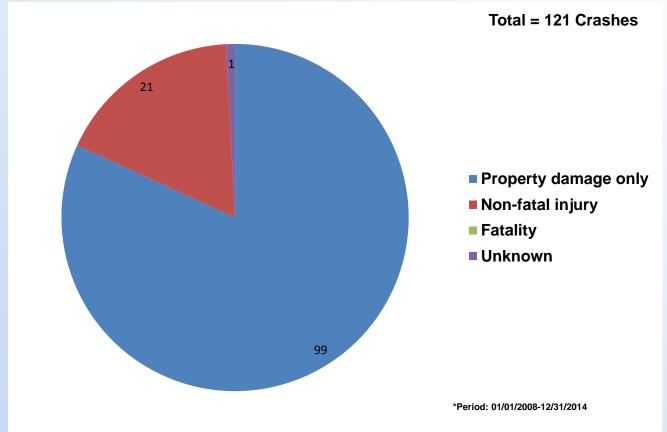

## Crash Type

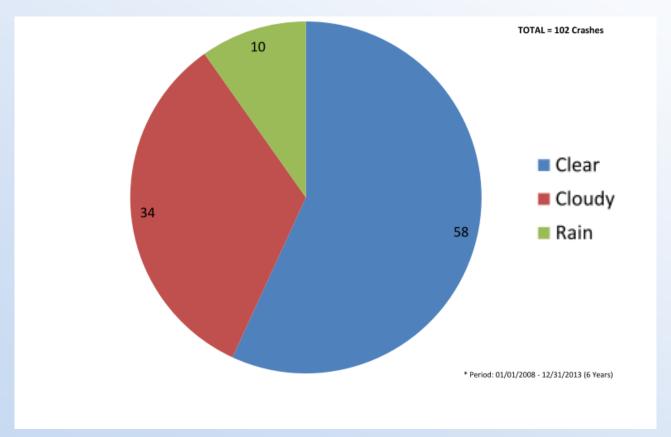

## **Crash Severity**

#### Weather Conditions

## **Existing Traffic Pattern**

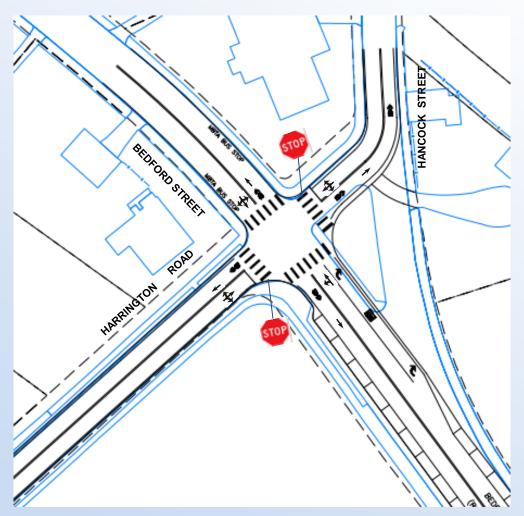

## **Design Options**

- 1. Remove the Bedford Street right-turn slip lane.
- 2. Option 1 with traffic signals.
- 3. Retain the Bedford Street right-turn slip lane one-way away from Bedford Street.
- 4. Option 3 with traffic signals.
- Make Harrington Road one-way away from Bedford Street (southbound). Remove the Bedford Street right-turn slip lane.
- 6. Make Harrington Road one-way toward Bedford Street (northbound). Two-way STOP control.
- Make Harrington Road one-way away from Bedford Street (southbound).
   Retain the Bedford Street right-turn slip lane.
- 8. Make Harrington Road one-way away from Bedford Street (southbound). Make the Bedford Street right-turn slip lane one-way away from Bedford Street.
- Make Harrington Road one-way away from Bedford Street (southbound).
   Make Bedford Street one-way between Massachusetts Avenue and Harrington Road. Roundabout.

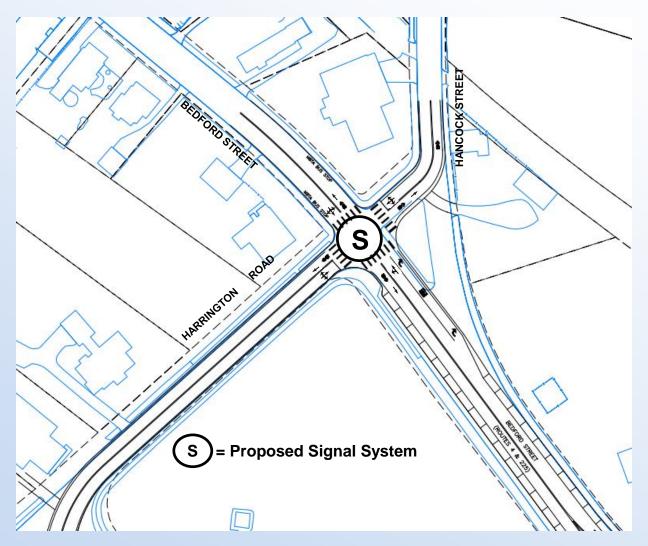

Option 1 – Remove Bedford Street Right-Turn Slip Lane

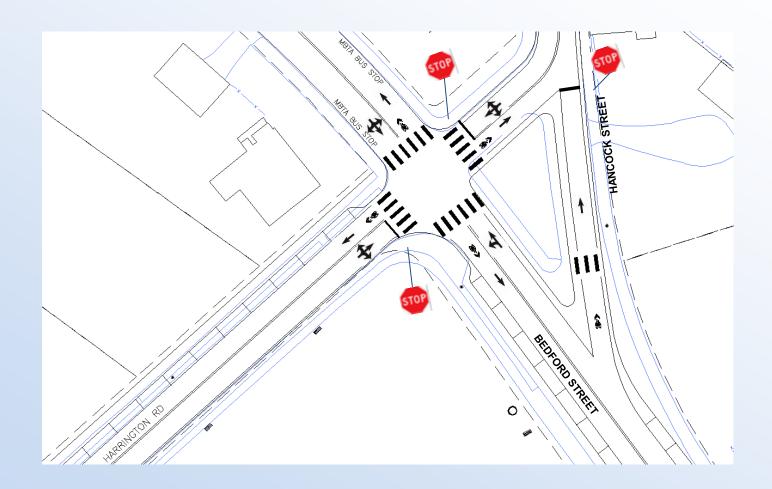

Option 2 – Option 1 With Traffic Signals

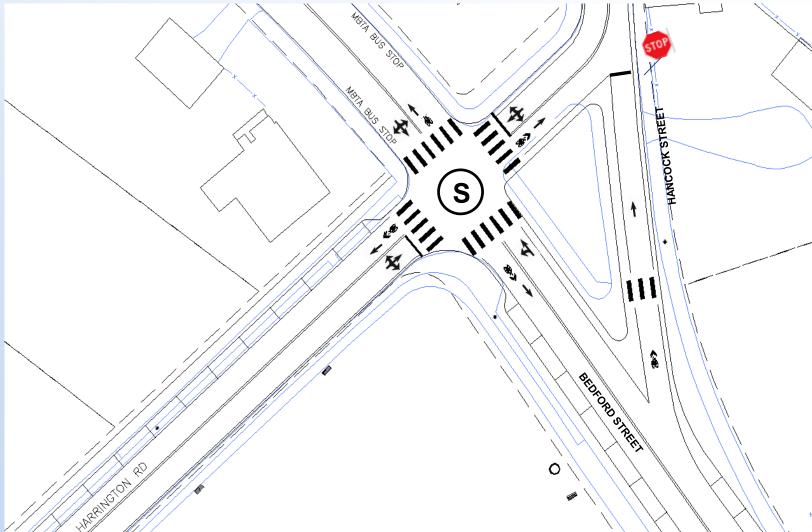

Option 3 - Retain the Bedford Street Right-Turn Slip Lane with one-way away from Bedford Street

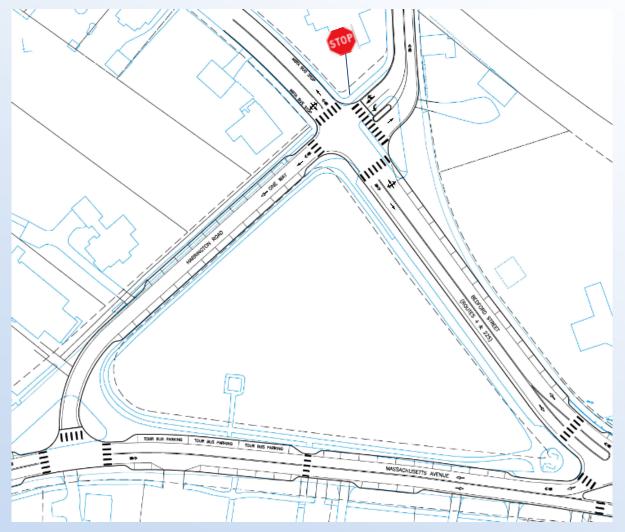

Option 4 – Option 3 With Traffic Signals

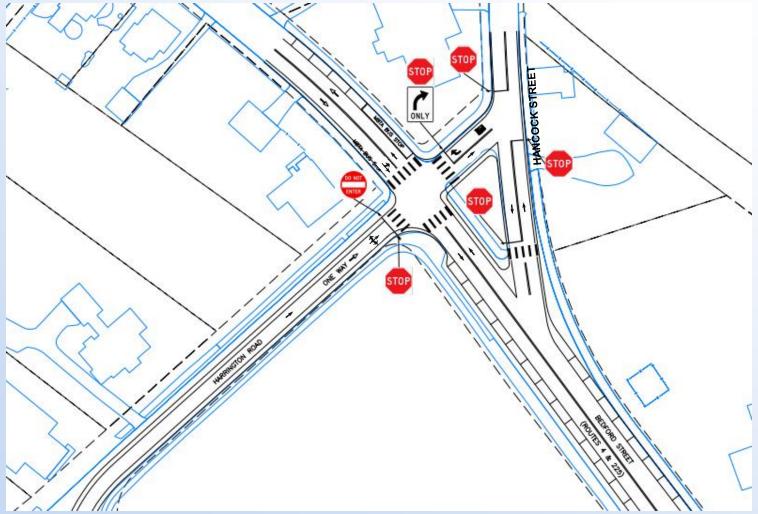

Option 5 – Make Harrington Road One-Way From Bedford Street (Southbound)
Remove the Bedford Street right-turn slip lane

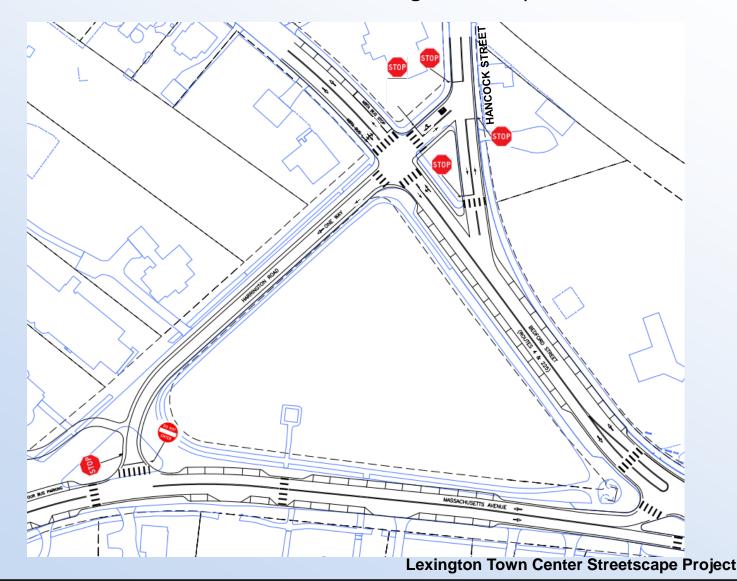

Option 6 — Make Harrington Road One-Way Toward Bedford Street (Northbound)

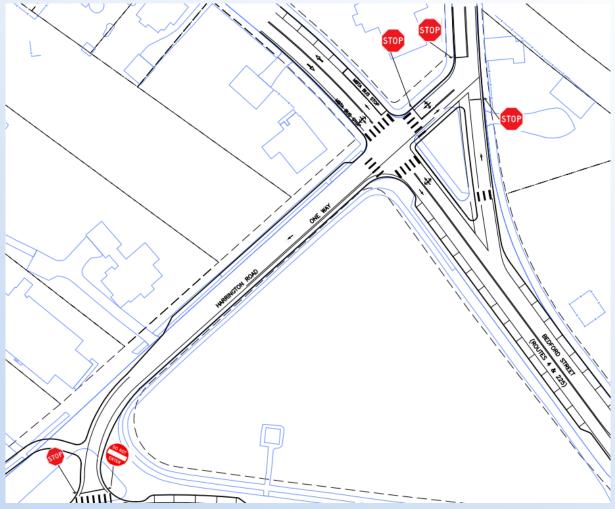

Option 7 – Make Harrington Road One-Way From Bedford Street (Southbound)
Retain the Bedford Street right-turn slip lane

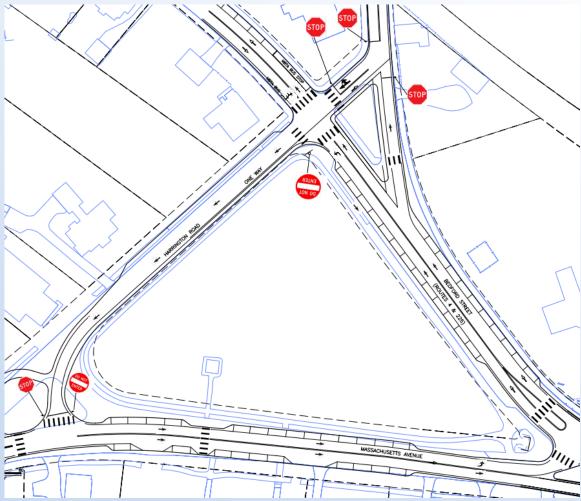

Option 8 – Make Harrington Road One-Way From Bedford Street (Southbound) with Bedford Street right-turn slip lane one-way away from Bedford Street

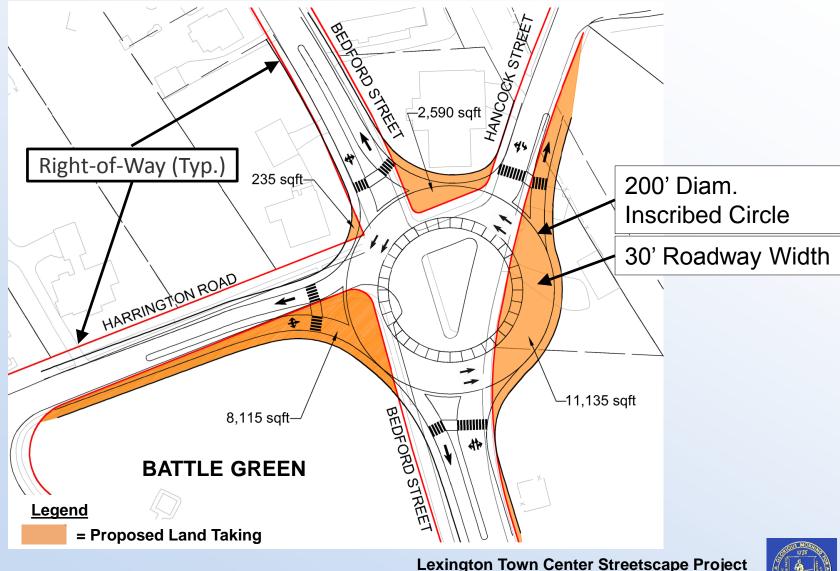

Option 9 – Make Harrington Road One-Way From Bedford Street (Southbound), Massachusetts Avenue one-way between Harrington Road and Bedford Street & Bedford Street one-way between Massachusetts Avenue and Harrington Road.

Option 10 - Roundabout

## **Traffic Analysis**

#### Level of Service and Delays

Design Option	LOS	Delay (s)
Existing	F	>> 50 sec*
Option 1	F	>> 50 sec*
Option 2	F	>> 50 sec*
Option 3	F	>> 50 sec*
Option 4	F	>> 50 sec*
Option 5	F	>> 50 sec*
Option 6	F	>> 50 sec*
Option 7	F	>> 50 sec*
Option 8	F	>> 50 sec*
Option 9	F	>> 50 sec*
Option 10 Roundabout	В	13.2 Sec

Information reflects Hancock Street approach only.

<sup>\*</sup> Approach experiences significant delay.

Design Option	Pros	Cons
Existing		<ul> <li>Unprotected pedestrian crosswalk</li> <li>Poor operation (LOS F)</li> <li>Unsafe traffic patterns</li> <li>Poor sight lines</li> </ul>
Option 1 – Remove the Bedford Street Right- Turn Slip Lane	<ul><li>Improved traffic safety</li><li>Fewer conflict points</li></ul>	<ul> <li>Unprotected pedestrian crosswalk</li> <li>Poor operation (LOS F)</li> <li>Potential impacts to Revere Street and Meriam Street Neighborhoods</li> </ul>
Option 2 – Option 1 with Traffic Signal	<ul> <li>Full pedestrian/bicycle Protection</li> <li>Improved operation on Harrington Road Northbound</li> <li>Improved traffic safety for side street traffic entering Bedford Street</li> </ul>	<ul> <li>Poor operation (LOS F) Queue backups to Waltham Street</li> <li>Signal equipment impact to historical character of Battle Green</li> <li>Maintenance of traffic signals</li> <li>Potential impacts to Revere Street and Meriam Street Neighborhood</li> </ul>
Option 3 – Retain the Bedford Street Right- Turn Slip Lane with one-way away from Bedford Street	<ul> <li>Improved traffic safety at Hancock and Bedford Street</li> <li>Fewer conflict points</li> </ul>	<ul> <li>Unprotected pedestrian crosswalk</li> <li>Poor operation (LOS F)</li> <li>Potential impacts to Revere Street and Meriam Street Neighborhoods</li> </ul>
ENGINEERING SUCCESS TOGETHER	Lexington 10	wn Center Streetscape Project 💹 👰 🧊

Design Option	Pros	Cons
Option 4 – Option 3 with Traffic Signals	<ul> <li>Full pedestrian/bicycle Protection</li> <li>Improved operation on Harrington NB</li> <li>Improved traffic safety for side street traffic entering Bedford Street</li> </ul>	<ul> <li>Poor operation (LOS F) Queue backups to Waltham Street</li> <li>Signal equipment impact to historical character of Battle Green</li> <li>Maintenance of traffic signals</li> <li>Potential impacts to Revere Street and Meriam Street Neighborhoods</li> </ul>
Option 5 – Make Harrington Road one-way from Bedford Street (southbound) Remove the Bedford Street right-turn slip lane	<ul> <li>Fewer conflict points</li> <li>Redirect approx. 200 vehicles during peak hour period.</li> </ul>	<ul> <li>Unprotected pedestrian crosswalk</li> <li>Poor operation (LOS F)</li> <li>Impacts to intersections of Worthen Rd @ Mass Ave and Bedford St</li> <li>Potential impacts to Revere Street and Meriam Street Neighborhoods</li> </ul>

Design Option	Pros	Cons
Option 6 – Make Harrington Road one-way toward Bedford Street (northbound)	• Fewer conflict points	<ul> <li>Unprotected pedestrian crosswalk</li> <li>Poor operation (LOS F)</li> <li>Impacts to intersection of Worthen Rd @ Mass Ave and Bedford St</li> <li>Traffic weaving on Bedford St to Mass Ave</li> <li>Potential impacts to Revere Street and Meriam Street Neighborhoods</li> </ul>
Option 7 – Make Harrington Road one-way from Bedford Street (southbound) Retain the Bedford Street right-turn slip lane	<ul> <li>Fewer conflict points</li> <li>Reduced approx. 200 vehicles during peak hour period.</li> </ul>	<ul> <li>Unprotected pedestrian crosswalk</li> <li>Poor operation (LOS F)</li> <li>Impacts to intersection of Worthen Rd @ Mass Ave and Bedford St</li> </ul>
Option 8 – Make Harrington Road one-way away from Bedford Street (southbound) Make the Bedford Street right-turn slip lane one-way away from Bedford Street	<ul> <li>Fewer conflict points</li> <li>Reduced approx. 200 vehicles during peak hour period.</li> </ul>	<ul> <li>Unprotected pedestrian crosswalk</li> <li>Poor operation (LOS F)</li> <li>Potential impacts to Revere Street and Meriam Street Neighborhoods</li> </ul>

Design Option	Pros	Cons
Option 9 – Make Harrington Road one-way away from Bedford Street (southbound) Make Massachusetts Avenue one-way between Harrington Road and Bedford Street Make Bedford Street one-way between Massachusetts Avenue and Harrington Road.	<ul> <li>Simplified traffic circulation</li> <li>Fewer conflict points</li> </ul>	<ul> <li>Unprotected pedestrian crosswalk</li> <li>Poor operation (LOS F)</li> <li>Impacts to intersection of Worthen Rd @ Mass Ave and Bedford St</li> <li>Potential impacts to Revere Street and Meriam Street Neighborhoods</li> <li>Severe congestion around Battle Green roadways</li> </ul>
Option 10 – Roundabout	<ul> <li>Controls traffic without the use of traffic signals</li> <li>Satisfactory operation (LOS B)</li> </ul>	<ul><li>Requires extensive Right-of-Way</li><li>Volume requires a 2-lane roundabout</li></ul>

#### Thank You!
